

Prism Mounting & Post Holder

Prism Turn Tables

RD-PDT-B (big)

RD-PDT-S (small)

Maximum capacity central	100 N
Inclination around both horizontal axes	$\pm 3^\circ$
Turning around the vertical axis	$\pm 9^\circ$
Adjustment sensitivity	2'

Mirror Mounts for Prism Mounting

New back-plate with clamping arm for mounting of prisms.
(one clamping arm included).

Inclination Tables

Our mirror mounts (MDI-G) can also be used as inclination table, because there is a M6-thread on the back. The mounts as inclination tables are offered with thread pin and alternate inserts for optical components. The alternate insert offers the possibility to rotate the optical components around the axis perpendicular to the inclination table.

MNI-inclination table **RD-ICT-MNI**
with alternate insert and one clamping arm

MDI-inclination table **RD-ICT-MDI**
with alternate insert and one clamping arm

MXI-inclination table **RD-ICT-MXI**
with alternate insert and one clamping arm

Beam Dump

RD-BD

- With M4 thread
- Passive cooling
